SHASHANK SINGH

VULNERABILITY MANAGEMENT SPECIALIST | RAPID7 | QUALYS

Phone: +91-9696 959695 **Location:** Noida, UP, India - 201304

Email: singh-shashank@hotmail.com **LinkedIn:** linkedin.com/in/shashankmpgi

EXECUTIVE SUMMARY

Vulnerability Management Specialist with 6 years of IT experience, including more than 5 years managing enterprise vulnerability identification, risk-based prioritization, remediation governance, SLA tracking, security reporting, and audit support. Hands-on experience with Rapid7 InsightVM, Qualys, Tenable Nessus, ServiceNow, CVE/CVSS analysis, risk assessment, asset tagging, scanner coverage, False-Positive & Zero-Day validation, risk exceptions, and remediation automation using Python and REST APIs.

KEY ACHIEVEMENTS

- Reduced critical vulnerability MTTR by 66%, from 45 days to 15 days, through risk-based prioritization and remediation governance.
- Improved enterprise asset visibility to 98% through scanner coverage, agent rollout, subnet tagging, and ownership mapping.
- Cut manual reporting effort by 60% using Python, REST APIs, Rapid7 InsightVM data extraction, and ServiceNow integration.
- Maintained audit-ready vulnerability evidence, risk exceptions, SOPs, and governance metrics for leadership and compliance reviews.

CORE EXPERTISE & TECHNICAL SKILLS

Vulnerability Management Platforms & Operations: Rapid7 InsightVM, Qualys, Tenable Nessus, vulnerability discovery, authenticated and agent-based scanning, scan validation, asset assessment, remediation tracking, closure verification, zero-day assessment, false-positive validation, and risk exceptions.

Risk-Based Prioritization & Analysis: CVE analysis, CVSS v3/v4, exploit and threat context, asset exposure, business criticality, compensating controls, vulnerability aging, risk scoring, and remediation priority.

Scanner, Asset & Coverage Management: Scan engines, collectors, scan assistants, cloud agents, asset discovery, IP range and metadata-based tagging, ownership mapping, platform grouping, scan coverage analysis, and blind-spot reduction.

Remediation & SLA Governance: Patch ownership, remediation plans, SLA and KPI tracking, aging analysis, breach escalation, cross-functional remediation follow-up, exception governance, evidence review, and closure validation.

VM Reporting, Automation & Compliance: ServiceNow, BMC Remedy, Jira, Python, REST APIs, Power Automate, data extraction, dashboard inputs, workflow automation, executive risk reporting, CIS Benchmarks, NIST CSF, audit evidence, SOPs, and audit readiness.

Supporting Network, Cloud & Infrastructure Security: Azure Cloud Security, Cisco, Meraki, FortiGate, firewall rules, IPSec VPN, network segmentation, SolarWinds, Aruba AirWave, CheckMK, network monitoring, incident triage, RCA support, and vendor coordination.

CERTIFICATIONS & EDUCATION

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA), ID: CSCO14584610
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)

TRAINING: ITIL v4 Foundation, Azure Cloud Security, Generative AI, SentinelOne Endpoint Security, CIS Benchmarks & Secure Config Training

PERSONAL DETAILS

Date of Birth: 10/10/1996 **Gender / Status:** Male (Married)

Current Address: Sector-12, Noida, Uttar Pradesh - 201304 **Nationality:** Indian

PROFESSIONAL EXPERIENCE

HCLTech | Noida, India

Senior Specialist | Vulnerability Management & VAPT

- Manage the end-to-end vulnerability lifecycle for 15,000+ endpoints using Rapid7 InsightVM and Qualys Cloud Agents, covering discovery, scanning, validation, prioritization, remediation, and closure.
- Build Python and REST API automation that connect InsightVM data with internal dashboards and ServiceNow workflows, reducing manual reporting effort by 60%.
- Create asset tagging rules based on IP ranges, host metadata, business ownership, platform type, and remediation owner to improve ticket routing and patch accountability.
- Prioritize CVEs using CVSS, threat intelligence, exploit status, asset exposure, business impact, and compensating controls, then issue clear remediation plans to technical owners.
- Present monthly vulnerability governance metrics, SLA status, exception trends, risk movements, and remediation blockers to IT leadership.
- Deploy scan engines, collectors, scan assistants across segmented networks, improve scanner visibility by 35% & reducing blind spots.
- Validate complex findings manually, remove false positives, and save engineering teams about 12 hours per week in avoidable remediation work.
- Prepare SOPs, HLD/LLD documents, risk evidence, scanner reports, and audit-ready remediation proof with a 100% audit pass rate.

Fujitsu Consulting India Pvt. Ltd. | Noida, India

May 2022 – May 2025

Technical Service Engineer – Vulnerability Management

Cybersecurity & Multi Cloud Services

- Ran weekly vulnerability scans across hybrid environments using Tenable Nessus and Rapid7, achieving 100% coverage for in-scope assets.
- Integrated InsightVM findings with ServiceNow and BMC Remedy ticket flows, improving assignment speed by 40% and reducing handoff delays.
- Performed web application security testing with Burp Suite Professional, covering OWASP Top 10 risks, business logic flaws, XSS, SQL injection, and authentication issues.
- Tested HTTP/HTTPS requests, repeater workflows, payload injection, and fuzzing scenarios to confirm exploitability and reduce false positives.
- Led daily remediation triage with server, application, database, network, and patching teams, increasing SLA compliance to 92%.
- Defined risk treatment paths for legacy systems, including patch timelines, temporary mitigations, compensating controls, exception tracking, and owner follow-up.

HCLTech | Noida, India (8 Months on Maintec Payroll)

Dec 2020 – May 2022

Network Analyst – Infra & Network Operations

Network Engineering BAU

- Resolved P1/P2 network incidents across global enterprise sites within SLA using structured triage, vendor follow-up, and root cause tracking.
- Monitored enterprise network health using SolarWinds, Meraki Dashboard, Aruba AirWave, and CheckMK to detect outages, link drops, and device health issues.
- Configured firewall rules, IPSec VPN tunnels, content filtering, and IPS policies on FortiGate and Meraki MX platforms.
- Automated Meraki inventory and firmware checks with Python and Dashboard APIs, improving team efficiency by 25%.
- Coordinated RMA, circuit checks, and escalation cases with Cisco TAC, Aruba TAC, ISPs, and internal network teams to reduce downtime.

KEY TECHNICAL PROJECTS & SECURITY INITIATIVES

• Enterprise Vulnerability Dashboard & Automated Remediation Workflow

Architected an internal dashboard integrating Rapid7 InsightVM REST APIs with ServiceNow via Python scripts, automating ticket creation, asset tagging, and executive risk metrics generation.

• Automated Network Health Audit & Security Baseline Monitoring

Developed custom Python automation tools leveraging Meraki and SolarWinds APIs to continuously audit network device configurations against CIS Benchmarks, automatically flagging security drift.

DECLARATION

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge and belief.
